

What's the curb radius at an intersection in your neighborhood?

How to measure:

Stand in the street so you are lined up with both curbs of the corner. [B] Measure the distance from you to where the curb starts to curve. [A] Watch out for cars!

Stand where B is marked on the diagram. Measure the distance from A to B. That is the curb radius.

Fill out the form and mail it to the address below, or visit www.missionped.org to submit your results!

Cross streets measured: _____

Curb Radius = _____

Name of person who measured: _____

Address: _____

Phone: _____

Mail completed form to Mission Pedestrian, 1711 Mission Street, Santa Cruz, CA 95060.
